Notes to the Editor:

Black Earth Farming Ltd. is a leading farming and land owning company operating in Russia. It acquires, owns and cultivates agricultural land assets primarily in the fertile Black Earth region in southwest Russia. Black Earth Farming was among the first foreign financed companies to make

substantial investments in Russian agricultural land assets, and because of its early establishment, Black Earth Farming has now gained a strong market position in the Kursk, Tambov, Lipetsk, Samara, Voronezh and Ryazan areas, controlling 280,000 hectares of what perhaps is the world's most fertile soil. Black Earth Farming will continue to acquire farmland in order to draw full benefits of economies of scale in its operations.

In 2007, Black Earth Farming harvested approximately 52,000 hectares of crops, of which the greater part was wheat.

Founded in 2005 by Michel Orlov, the company has been developed by the listed investment companies Vostok Nafta Investment Ltd. and Investment AB Kinnevik (publ).
